A quasi-entropic model of the dynamics of a polymer system is presented. Two different Monte Carlo simulations on polyethylene glycol diacrylate (PEGDA) and polyglycerol polyacrylate (PGP) solutions demonstrate the

accuracy of the model. The results for PEGDA are compared to the corresponding molecular dynamics simulation. This shows that the proposed model can serve as an excellent tool to perform coarse-grained simulations on the dynamics of polymer solutions.

It might be used as a first step to a more refined treatment of polymer dynamics in coarse-grained models. Links Saturday, September 13, 2011 This is not my new design. I was inspired by R.F. Kuang's series "Fairyland." I'd heard a lot of good things about his writing from my friends and discovered at amazon.com that he was getting rave reviews! I had never read a book by him, but after reading The Immortal Legend series I was already in love with his writing style! 2. What is the first book you remember reading? The very first book I read was "101
