What's new:

People don't like how combat works in this game, either. First off, there's a massive delay after tapping an action, which makes any interaction fairly sluggish. After doing the same action multiple times, the cooldown increases - and with it, the delay. This affects a multitude of actions, such as constantly switching from blocking to attacking etc. So whenever the action menu, the main action screen, is completely displayed on screen for a moment, it is interrupted by a rather long freeze that takes a noticeable portion of time out of each action - several actions per second. Another thing about combat: It's supposed to be a turn-based battle, but everything that the player can act upon takes place pretty much right after the turn is done, and it all happens a second time. So whenever the player moves, thrusts, grapples or uses a sort of magics, they will instantly receive damage (or even more, depending on the item equipped) and then the enemy will immediately act, and it will even happen twice a second - stuff which should apparently be blocked, like Swaying can work twice a second! Playing single player seems pretty good since there is no active multiplayer or anything when you're playing. Only downside is that most monsters have HP which shows in red, meaning that it gets re-spawned and can't be killed. And you can't perform saves. So when the HP reaches 0, the game is over. When you finish a story, you get a big epilogue scene where the NPCs talk about your character. And sometimes they talk as if you were there in the room with them - if you did something kind or assisted them, they say "thank you". Had a few issues as my computer was maxed but now it's running fine for me. Love being in the depth of the land and seeing the stories of the characters I create doing simple tasks for people. Seems to be fairly complete but just finishing some of the available quests at the moment, waiting for a few more to be completed. Graphics are nice and the combat mechanics seem well thought out and solid. I'll do a more detailed review later if it still available. This game is great. There is an offline mode which is a great idea and the micro-transaction collecting system keeps the game going even through the lack of updates. There is plenty to do without having to buy gems or other currency. As a Dungeon Master, you constantly have to find ways to introduce monsters
