What's New In DriverIdentifier?

- Works online
- Scan your computer system and report the details
- Report the status of each driver in the system
- Download the latest version of the drivers that need to be updated

DriverIdentifier includes two options, a free and a paid version. However, the free version is only valid for a day only, while the paid one can be used for any period of time. DriverIdentifier is a reliable driver scanner designed to inspect your computer in order to generate a report on outdated or missing drivers. In addition to this, the application also provides users with download links for the drivers in need of update. The well-being and the performance of any computer depends on a robust device configuration, as well as on frequent maintenance operations. This includes driver care, amongst others. Outdated or missing drivers will often lead to errors, hardware issues and the impossibility to perform common computer operations such as listening to music or playing a game.

However, updating the drivers installed on the computer solves all of the problems mentioned above and improves the overall machine performance. Such an operation can be performed manually, which can be a time consuming process or automatically, using a third-party software.
