Category:2011 booksThe invention relates to an apparatus for the local deposition of a solidifiable ink on a printing form or a printing material, for example paper or cardboard. At present, there is no apparatus available that is suitable for the local deposition of a solidifiable ink on a printing material or printing form in or on the printing form. It is the object of the invention to provide an apparatus of the above-mentioned type, in which the printing material or printing form can be brought into an ink-receptive, i.e., locally coated, state. This object is attained by the invention. The invention provides an apparatus for the local deposition of a solidifiable ink, in particular a radiation-curable ink, on a printing form or a printing material, in particular paper or cardboard, that comprises at least one exposure unit for the exposure to radiation of a portion of the printing material, at least one press unit, in which the printing material is held in a holding region and can be subjected to a pressing operation, at least one solidifiable ink carrier, which comprises at least one ink jet nozzle, a pressure unit and a mixing unit, and at least one processing unit for the processing of the ink jet nozzles. Other objects, advantages and novel features of the present invention will become

apparent from the following detailed description of one or more preferred embodiments when considered in conjunction with the accompanying drawings.

Q: MySQL Recursive Query I have a database (MySQL) of contents, with a category called 'media' (a category, a page can be in a category as well as one of its subcategories) and subcategories called 'album' and 'artists' (a subcategory can have a subcategory of artists as well as it's own artists). I would like to extract a list of all the subcategories of an item. The item's id is a parameter and I'm using it in the query (no problem there) The logic I would like to use is: if in the query I find an artist named TomHiddley I would want all the albums from his playlists, so if it finds 'TomHiddley' I would want to show all the albums he owns
