U.S. President Donald Trump holds a joint news conference with Mexico's President Enrique Pena Nieto (not pictured) in the White House in Washington, U.S., August 27, 2017. REUTERS/Carlos Jasso The new accord will see the removal of many cosmetic changes from NAFTA to reduce market uncertainty and boost investor sentiment, said Dennis Shea, president of the U.S. Chamber of Commerce's international trade council. "We recognize there are going to be changes to markets but we're going to fix the ones that are barriers to legitimate trade and commerce," he said in an interview. The agreement will replace the 1993 NAFTA pact with Canada and Mexico and will be released by U.S. President Donald Trump on Friday. With Washington and Mexican leaders busily wrapping up high-profile visits to each other's countries this week, U.S. and Mexican trade officials held the first formal meeting of the NAFTA rewrite team in late August. They are scrambling to expedite the 12-month process of rewriting the deal before it expires on March 1. Trump has called for a quick and large portion of the deal, but analysts said lawmakers are unlikely to approve the massive trade overhaul in a matter of weeks. U.S. Trade Representative Robert Lighthizer and Mexican Economy Minister Ildefonso Guajardo started a round of talks in Washington on Tuesday, and if reached a deal on Friday, would have four days to fly to Mexico City for the signing, the officials said. The deal would revise current U.S. content rules and align them more closely with the agreements the United States has with other countries, the officials said. The U.S. content rules in effect under NAFTA are

The symfony documentation says I need to use php 4.3.2 and I have 4.4.6. The only PHP I have is version 4.4.6. It's a LAMP server, so I have apache and php. It looks like the mysql version is compatible though. I made symfony run fine from cgi-fcgi.com with apache2 A: this might be too late but for anyone else coming across this error, as of now the error message has been removed from the docs, this is because it required php 4.2.4, but you can download this via git at: which you can then add to your PATH to get the latest version of symfony with: /usr/bin/git clone when that's done you can start it using this command: /usr/bin/php.bin -S symfony/cmd -r /path/to/symfony/src --dev I had this error: [Zend_Loader_Autoloader::getInstance()] (include_path=`/usr/local/php/extensions/no-debug-non-zts-20090626/') return; After parting ways with his sister, Brittany "Bridezilla" Michele, Josh Murray made the decision to move forward with a real-life wedding to his fianceé, Jen Harley. But now, months later, and barely an hour before their wedding was set to begin, BridalBlog.com can exclusively reveal that Josh and Jen's stunning nuptials have
